

March 16, 2016

For Immediate Consideration

## **Roundup®: Non-Hodgkins Lymphoma (NHL)**

**\* If you or someone you know has been diagnosed with Non-Hodgkins Lymphoma your deadline to act may expire on July 29, 2016.**

**A Cancer Investigation by the World Health Organization (WHO) reported on July 29, 2015 that “[Roundup® is probably carcinogenic to humans.](#)”**

**California has classified Roundup® as [probable to cause Cancer.](#)**

**Patients diagnosed with Lymphoma more than 4 years ago may face a July 29, 2016 deadline to protect compensation rights for NHL caused by exposure to *Roundup*®.**

### **Why Are We Investigating?**

Farmers are the particular focus of the July 29, 2015 action of the WHO Int’l Agency for Registry of Cancers. Five (5) farmers diagnosed with NHL who approached us all think exposure to *Roundup*® is a likely cause of their disease. *Roundup*® contains glyphosate.

### **Your Deadline!**

If you are a Nebraskan **diagnosed more than 4 years ago**, the law likely requires a court filing by July 29, 2016. If you were **diagnosed with NHL within the past 4 years**, you must act before the 4<sup>th</sup> anniversary of your diagnosis. Deadlines differ by State.

### **How Does *Roundup*® Cause Blood Cancer?**

*Roundup*® is inhaled through breathing and absorbed through contact. Dosage levels that cause cancer vary widely—from a single season to annual exposures for decades.

[Domina Law Group pc llc](#) and **Weitz Luxenberg pc** are forming the consortium to investigate and develop these cases for farmers throughout NE and across the Country.

Contact us if you have NHL or if someone you know does: [roundup@dominalaw.com](mailto:roundup@dominalaw.com)

\*WHO also added pesticides, malathion and diazinon, to the “probable” category.
